Activity Name: HIV/AIDS/TB/STI- Youth Awareness

Purpose: Creating awareness about HIV in the community.

Event Venue: Manavlok College of Social Work Ambajogai Dist. Beed

Beneficiary: Persons between the ages of 18 and 40.

Resource Person: Mr. Dhanaraj Pawar –Counselor SRTR Medical College Ambajogai

Date : 15 /12/2021

Important Message:

1. AIDS is an incurable but preventable disease. HIV, the virus that causes AIDS, is transmitted through unprotected sex (sex without a condom), contaminated blood transfusions, using contaminated needles and syringes (which are often used to inject drugs), and from an infected pregnant mother to her child during pregnancy, delivery, or breastfeeding.
2. All people, including children, are at risk of HIV/AIDS. Everyone needs to be informed and educated about the disease and access of condoms should be facilitated.
3. A person who suspects HIV/AIDS infection can go to a health worker or an HIV/AIDS center to receive help and counseling.

Evaluation:

Patient and students of MSW, village youth groups and women attended the public awareness program about HIV.
