Pulse Polio Campaign 2021

Polio is a paralysis caused by a virus. Polio affects children under five years of age. It is a viral disease that is found in large numbers in the poorest countries of the world. The virus is only found in humans. This effect is more common in infants and young children. Polio is a disease vaccine supplied worldwide through the World Health Organization.

100 National Pulse Polio Vaccination was conducted on 19th January 2021 by the Department of Public Health, Government of Maharashtra and District Integrated Health Family Welfare Society, Beed. Students of Manavlok Social Work College participated in this vaccination.

Trained the children on how to administer the dose. Health officials and staff also instructed the students to be present at the respective vaccination centers in the morning. Dr. Hanumant Salunke of the College acted as the Coordinator of Polio Vaccination Campaign 2020.
